Telephone display

The Avaya 2033 IP Conference Phone has two display areas:

- The upper display area contains single-line information for items such as the caller number, caller name, feature prompt strings, user-entered digits, date and time information, and set information.
- The lower display area provides soft key label information.

Cleaning the display screen

Gently wipe the screen with a soft, dry cloth.

Caution: Do not use any liquids or powders on the phone. Using anything other than a soft, dry cloth can contaminate telephone components and cause premature failure.

Telephone status indicators

The Avaya 2033 IP Conference Phone uses three bi-color LED lights, located around the speaker, to indicate the telephone status.

The table lists the telephone state corresponding to the status indicator.

Table 1 Status indicators

LEDs	Status
Solid green	Active call
